

TECHNICAL INFORMATION SHEET

Degreaser

Description

Degreaser is a state-of-the-art chemical designed to be sprayed on or applied with a brush, to remove oil-based contamination. Degreaser will safely emulsify petroleum-based products, including food grade products. Degreaser is a highly concentrated formulation that incapacitates the oil and grease, not allowing re-contamination through the cleaning process. Typical applications include pre-cleaning metal parts prior to a painting process, floor cleaning, equipment cleaning.

Instructions

Degreaser is a stable chemical formulation which is designed for a safe de-greasing cleaning process. It can be sprayed on or applied with a brush. It is designed to encapsulate the grease & oil contamination, resulting in a cleaner surface area, without re-transferring the contaminants into the substrate resulting in out gassing and fisheye caused when contaminants are not removed.

Appearance	Clear
Physical State	Liquid
Color	Lite Green Solution
Odor	Lemon Scented
pH	>13.3 neat
Flash Point	> 200.0 F. (closed cup)
Evaporation Rate	slow
Vapor Pressure	0.94 hpa (1 hpa = 0.75006mmhg)
Pounds Per Gallon	8.87 lbs.
Specific Gravity	1.29
